Assignment 1:

Design the following website using only HTML. The details of the website are as follows:

- Use tables for the layout of the home page (Figure 1) and the registration page.

- When the user clicks About, it will take them to this link:

  https://www.umkc.edu/about/index.html in a new tab.

- Use headings, lists, and paragraphs to format the text in the homepage.

- When the user clicks the register now image, it should take them to the registration page

  (Figure 2).

- Embed this YouTube video in the homepage:

  https://www.youtube.com/watch?v=1rwc_O6geNU

- Create a form with the specified fields.

Notes:

- Of course, your pages should look like the figures, but they don't have to be the exact same.

- You can find the images on Canvas in the module where this assignment is listed

- Submission: I expect a zipped file. Zip the html files together with the additional folders (e.g.

  images).

- You may use whatever software you wish to work on this—VS Code, NetBeans, an online

  compiler somewhere, anything goes.
